

Interior/Product Designer

We are searching for individuals who are prepared to take on the challenge of a demanding cross-functional role. You are a highly creative individual with a minimum of 3-5 years of design experience in both restaurant/commercial interior concepts and product detailing, with a high proficiency in AutoCAD (2007). Your degree/diploma in Interior Design or Architectural Technology is complimented by your knowledge of interior finishing materials, space planning abilities, building codes, and other applicable legal and professional requirements. 3D Modeling/Rendering would be an asset.

Please include salary expectations, as salary is commensurate with experience.
